ACTORS MOBILE ADR

USER GUIDE FOR ACTORS

Actors Mobile ADR™ *patent pending* is an iOS application designed for Actors to conveniently record their dialog, commonly known as ADR, on their iPhone or iPad. An Editor sends encrypted videos to the Actor who then records and returns ADR WAV files.

Pricing

It's Free for Actors.

Recording Recommendations

Record in a quiet room that has furniture with fabric and thick curtains. A walk-in closet works well. *Avoid rooms with hard flat surfaces, excessive glass, loud reverberations, or loud noise.*

[*This video shows a good recording location and position*](#)

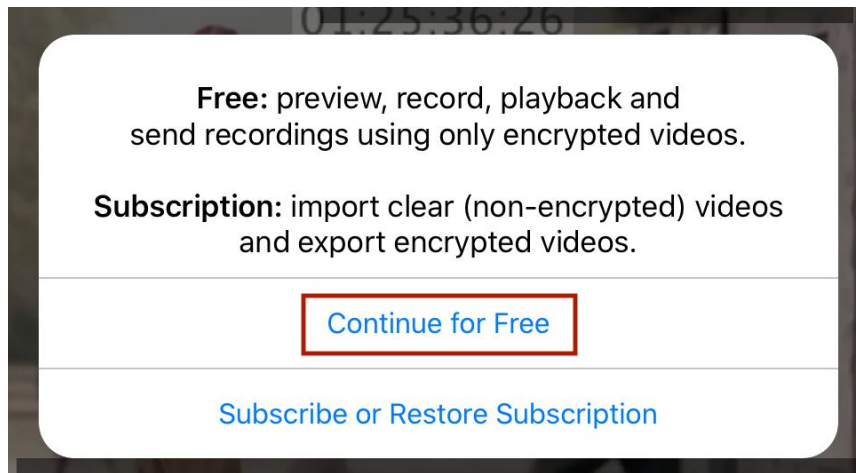

You may use the built-in microphone and speakers on the iPhone. For best results, we recommend the Rode VideoMic Me-L external microphone and 1/8" headphones. Please avoid using AirPods when recording. AirPods microphone quality is far lower. When recording, your iPhone should be about three quarters arms length away from you. *Excessive movement while recording can induce handling noise.*

1. Installation

- On your iPhone/iPad download and install Actors Mobile ADR from the App Store
<https://apps.apple.com/us/app/actors-mobile-adr/id1485569437>

- Tap “Continue for Free” option on the prompt window.

2. Import the videos that the Editor sent

The Editor will send videos to import on the Actors Mobile ADR App. They can be an encrypted video file or a zip file including multiple encrypted videos in it.

Note: The app works with one video per each ADR line to record.

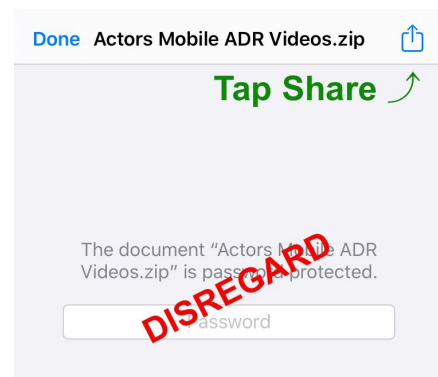

If an Actor has 5 ADR cues to record, the Editor will send 5 encrypted videos.

There are several ways to receive videos from (Telegram, Whatsapp, Email, Skype, etc.)
We recommend Telegram or Whatsapp.

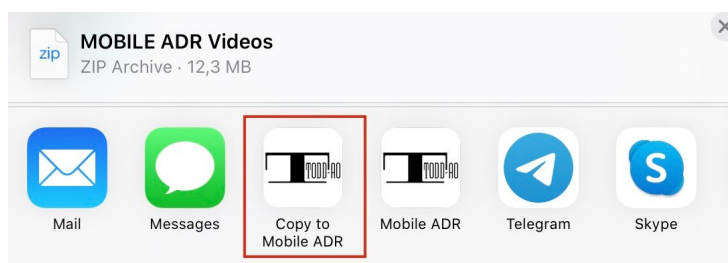

1- Open the Email, Skype, or Whatsapp chat.

2- Tap on the video or zip file that the editor sent to download.

3- Tap the Share  button on the upper right corner. An iOS sharing window will pop up.
(If you see the window at the right asking for a password, please disregard.)

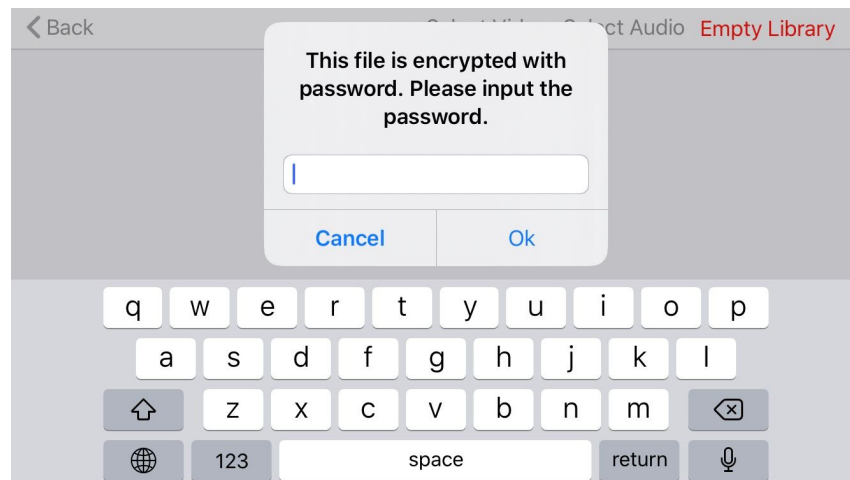

4- Select “Copy to Mobile ADR” option to import the videos. (*Do not tap on “Mobile ADR”*)

Note: If this option is not available. Swipe to the left on the same menu, tap on the “More” option, look for “Copy to Mobile ADR” and tap on it. Check the [video](#).

In case you are running Actors Mobile ADR on the new iOS 14 version, you need to tap and hold Mobile ADR Icon and the select “Open in app” option. [Check video](#)

5- (ONLY for Password Protected Videos) The editor will send you a password for security. Enter the password on the prompt window within the app and tap “OK”.

The videos will be imported into the app. Once in the App, you will be able to see the list of videos by tapping on the **Management** button and then the **Library** button.

[How To Import](#)

3. Preview the Video

You can preview the video as many times as needed to get the scene’s mood and tone.

Tap Preview  on the upper right to start playing. You will hear three beeps count before the ADR in and a wipe bar to let you know when to start.

[How To Preview](#)

4. Record ADR

Tap Record  to start recording. Tap Record again to do more takes.

[How To Record](#)

5. Send ADR Recordings

Tap Management  and then > Library  to see the recorded takes.

1- On the upper right tap “Select Audio” button.

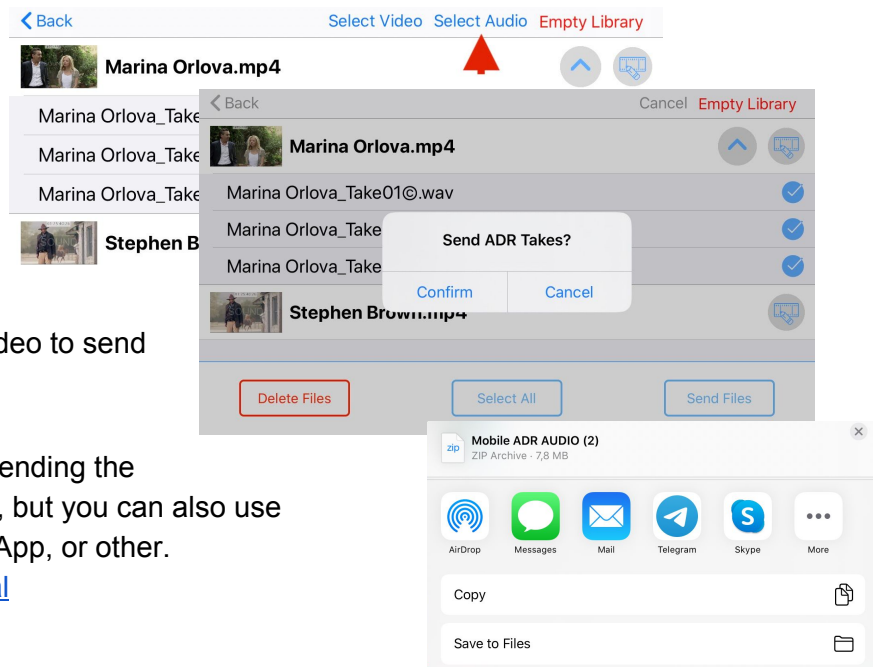

2- Select all recordings or the specific ones you want to send.

3- Tap the “Send Files” button.

You can also swipe to the right over a video to send all takes from that specific video.

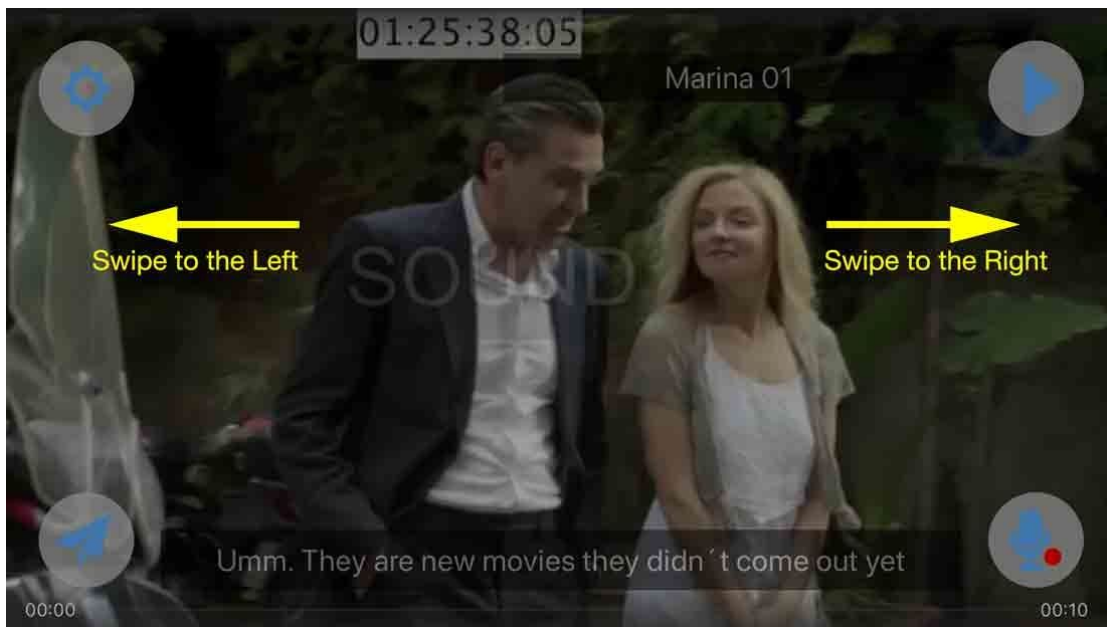

4- Choose the App you want to use for sending the files. We recommend using the Mail app, but you can also use Telegram, Tam Tam Messenger, WhatsApp, or other.

Menu Functions on Actors Mobile ADR™

Note: swiping right or left on the picture will switch to other movies loaded in Actors Mobile ADR™, this allows the Actor to quickly switch between Cues.

Preview Button: Plays the encrypted video and Stops when any button is pressed.

Note: when Previewing or Recording icons disappear for the Actor to focus on the picture.

Record Icon: Will quickly initiate Record mode which is indicated by a Red Circle.

If the Actor is using the built-in iPhone Speaker the Guide Track will play three beeps before the recording point, and then Mute the Guide Track on the third beep. This prevents overlaps of the Guide Track and Actor.

Selected Takes: Golden Ribbon is for Selected Takes. Default is white.

Note: For Golden Ribbon takes, you will see a "©" for Circle take (slang for selected) at the end of the filename.

ADR Playback: The current Take is the number in the center of the screen, tap the right or left arrows to switch to the other Takes. Tap the number to Playback an ADR Take. The Guide Track plays into the Recorded ADR and backs out to the Guide Track.

ADR Playback Offset: Tap + or - buttons to re-synchronize the recording on Playback. Value goes from -30 to +30 frames. 0 is no Offset.

Settings: The top left icon is for ADR settings (Beeps, Guide Track, and adjust ADR beeps).

Beeps: Default is On. Three audible beeps are heard before the ADR Start. When Off no beeps are heard. Sliding your finger vertically on the main screen changes the volume.

Wipe: Default is On. Classic ADR Streamer before the ADR Start.

Pre-Roll: Default is Off. Enabling it makes Preview, Record, and Playback, starts 7 seconds before ADR Start, instead of the video start. It's useful with long videos

Subtitle: Default is On. Press to hide the subtitles bar.

Guide Track: This option is available when the Actor is using Headphones in Record mode.

The default is Off, the Guide Track is muted on the third beep. When On, the Guide Track plays through the entire Record pass.

Spot/Edit ADR beeps: This option is available to visually spot or edit or correct the ADR Start & End time, if the Cue sheet is not available, in order to adjust the beeps and recording point.

Tap to go to ADR Start/End position.
Tap & hold to Set a new ADR Start/End.

Marina 01

Cue Name: This is the ADR Cue name and number.

Management: Show/Hide the Library and the Information section.

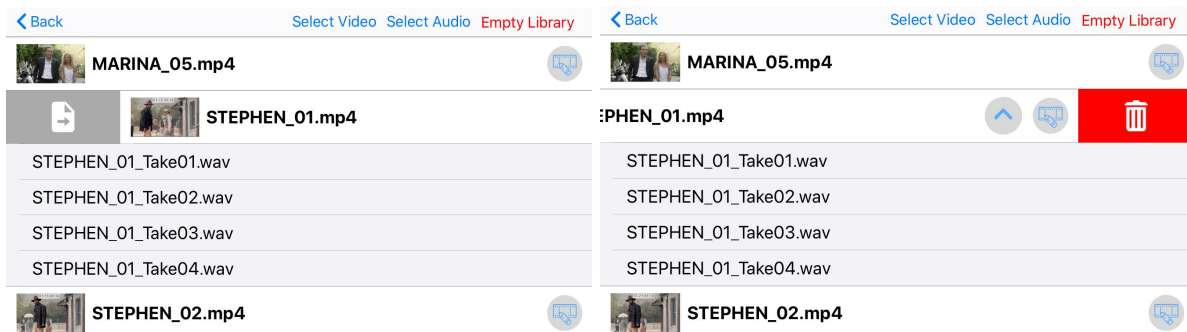

Library: Manages encrypted videos and ADR recordings.

Metadata Editor: Add/Modify the metadata of the videos.

Note: Swiping right on any file shows Send icon, while swiping left shows Delete icon.
